He has substantial experience in major projects both in the UK and overseas and regularly advises on PPPs, hospitals, sports stadiums, universities, skyscrapers, power projects and infrastructure ...

The FIDIC Conditions of Contract for Construction and the Conditions of Contract for Plant and Design-Build (known as the 1999 Red Book and the 1999 Yellow Book) were first published in 1999 and have been used for a large number of contracts around the world. During 2005, FIDIC and the multilateral development banks cooperated to publish the MDB Harmonised Conditions of Contract for Construction. This book is a revised and extended edition of the authors earlier guides.

In September 1999, FIDIC introduced its new Suite of Contracts which included a new Red, Yellow, Silver and Green forms of contract. The new Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: - background and concepts of the various forms of contract; - a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; - analysis of the rights and obligations of the parties involved in the contract and the allocation of risk concerned; - a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; - a much enlarged discussion of the meaning of 'claim' and 'dispute' and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer; - the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and - five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.

Provides a clear and comprehensive guide to the 2017 FIDIC contracts written by a member of the FIDIC Updates Task Group. FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer's Representative's function in the Silver including the new procedure for determinations as well as the Employer's obligations and contract administration. The Contractor's obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer's right to suspend the works; testing on and after completion and the Employer's taking over of the works; defects after taking over; acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects. Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books. Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts. Accessible to those with little or no familiarity with FIDIC contracts. The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.

The updated second edition of the practical guide to international construction contract law. The revised second edition of International Construction Contract Law is a comprehensive book that offers an understanding of the legal and managerial aspects of large international construction projects. This practical resource presents an introduction to the global construction industry, reviews the basics of construction projects and examines the common risks inherent in construction projects. The author, an expert in international construction contracts, puts the focus on FIDIC standard forms and describes their use within various legal systems. This important text contains also a comparison of other common standard forms such as NEC, AIA and VOB, and explains how they are used in a global context. The revised edition of International Construction Contract Law offers additional vignettes on current subjects written by international panel of numerous contributors. Designed to be an accessible resource, the book includes a basic dictionary of construction contract terminology, many sample letters for Claim Management and a wealth of examples and case studies that offer helpful aids for construction practitioners. The second edition of the text includes: Updated material in terms of new FIDIC and NEC Forms published in 2017; Many additional vignettes that clearly exemplify the concepts presented within the text; Information that is appropriate for a global market, rather than oriented to any particular legal system; The essential tools that were highlighted in the first edition such as sample letters, dictionary and more; A practical approach to the principles of International Construction Contract Law and construction contract management. Does not get bogged down with detailed legal jargon. Written for consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide, the second edition of International Construction Contract Law offers an essential guide to the legal and managerial aspects of large international construction projects.

FIDIC Contracts: Law and Practice is sure to become the leading industry standard guide to using the FIDIC forms, and is the only book to date which deals with the whole suites of contracts, including the new gold book for Design, Build and Operate projects. The White & Case work is outstanding in its detailed consideration and treatment of the legal aspects of the interpretation and application of the Conditions, touching on many points that most people would not have encountered. Humphrey L.Loyd, International Construction Law Review [2010] ICLR 386

Contributed papers presented at a symposium held by International Council for Research and Innovation in Building and Construction.

Written by a member of the FIDIC President's List of Adjudicators, this detailed and critical commentary on the FIDIC Red Book provides authoritative guidance and recommendations for best practice. Focusing on each Clause of the Condition of Contract, this book identifies pitfalls and logistics issues associated with its enforcement and ancillary processes, to give readers an advantage when operating with the FIDIC Red Book. Intended to promote the best use and growth of FIDIC, this guide will be essential for all users of the FIDIC Red Book, be they contractors, lawyers, engineers, students training to join these industries or any professional involved in the resolution of disputes involving the FIDIC Red Book.
