The Permanent Instruction of the Alta Vendita is a document, originally published in Italian in the 19th century, purportedly produced by the highest lodge of the Italian Carbonari and written by "Piccolo Tigre," codename for Giuseppe Mazzini. The document details an alleged Masonic plan to infiltrate the Catholic Church and spread liberal ideas within it. The Carbonari had strong similarities to Freemasonry and so the document is seen by some as a Masonic document. In the 19th century, Pope Pius IX[3] and Pope Leo XIII both asked for it to be published.

No Marketing Blurp

This radical anti-Masonic work alleges that the ideas of the Enlightenment philosophers of the eighteenth century motivated Freemasons to engage in an ongoing war against Christianity and the Catholic Church. A fascinating blend of conspiracy theories that links just about every revolutionary and nationalistic movement of the past three centurie.

This study of the origins and progress of Greek science focuses especially on the interaction between scientific and traditional patterns of thought from the sixth to the fourth century BC. It begins with an examination of how particular Greek authors deployed the category of "magic," sometimes attacking its beliefs and practices; these attacks are then related to their background in Greek medicine and philosophical thought. In his second chapter Lloyd outlines developments in the theory and practice of argument in Greek science and assesses their significance. He next discusses the progress of empirical research as a scientific tool from the Presocratics to Aristotle. Finally, he considers why the Greeks invented science, their contribution to its history, and the social, economic, ideological and political factors that had a bearing on its growth.

In the stunning and imaginative NOMBONO: An Anthology of Speculative Poetry by BIPOC Creators From Around the World, we are presented with visions, invocations, foretellings, and bold harbingers. NOMBONO, drawing from the Zulu word for "visionary," brings together mystical dreams and possibilities that are at times both striking and devastating. This anthology asks: are we on a bright threshold or at the edge of a dark precipice? Are we about to take flight and evolve or plummet into cataclysm? Around each corner in this book there may be a hyena man, salmon women, Mananggal, prayers, or curses. There is steady, unbroken eye contact, and there is fierce joy and fury. Here we have the limitless, boundless exploration of resplendent worlds.

Methods for the design, testing, validation, and analysis of short term trading systems.
