The book deals matters of K-K Line, including: (a) Survey by S.E. Railway from 1956-60, Construction by D.B.K. Railway from 1960-68, and Operation & Maintenance by S.E. Railway from 1968-82. (b) Mining and loading of Iron Ore at Kirandul and Bachel, Handling by Visakhapatnam Port Trust in loading into Ships at the Outer Harbor. (c) Provision of Track Structure of 90R, 52kg and 60 kg rails in stages on 8 curves & steep gradients of 1 in 60 and 1 in 80 covering 46 Tunnels and 14 Cut & Covers. (d) Problems of Wagons & Locomotives, and design considerations for use of heavier contact and catenary wires for Railway Electrification in continuous raising gradient Dantewara-Silakhjori section. (e) Important events occurred in Waltair Division from 1976-81, such as mega block for working of 8 material trains for lifting released Permanent Way materials; opening of K-K Line for Passenger Traffic. Emergency working on Waltair Division due sudden floods in Vamsadhara river near Srikakulam blocking both Main Lines and R-V line for 18 days; inaugural function for a new railway line connecting Koraput to Rayagada by Chief Minister of Odissa; instances of cyclonic damages and consequent blocking of Boddavara-Shimiliguda section for traffic for 30 days and more; and restoration operations carried out in 1983, 1990 and 2014 by CAOR (Construction), E. C. Railway, Waltair. Further, it recounts Author's experiences elsewhere in CPWD, S.E. Railway, IRCON, RITES and Private Companies.

This volume presents a collection of papers on the theme of rail integrity, which were presented at a meeting in Delft from 24--26th June, 1992. Rolling contact fatigue is a failure mode which is increasingly being recognised as a threat to the reliability of modern heavy freight and high speed railway systems. These papers describe the current understanding of the problem and what rail steel technology and maintenance procedures have to offer to combat it.

This book presents selected peer-reviewed papers from the International Conference on Recent Advancements in Air Conditioning and Refrigeration (RAAR) 2019. The focus is on current research in a very topical area of HVAC technology, which has wide-ranging applications. The topics covered include modern air conditioning and refrigeration practices, environment-friendly refrigerants, high-performance components, computer-assisted design, manufacture, operations and data management, energy-efficient

buildings, and application of solar energy to heating and air conditioning. This book is useful for researchers and industry professionals working in the field of heating, air conditioning and refrigeration.

By far the greatest proportion of the total cost of maintaining the infrastructure of a railway arises from the track, Modern trains are lighter, travel faster and are much easier to derail than before. Therefore it is vital that track is maintained adequately. This volume shows how railways can be kept running using the minimum necessary maintenance, taking into account the environmental conditions and the type and volume of traffic using the railway.

About the book This is the third edition of the bi-annual publication on advance rulings and appellate advance rulings containing the gist and text of rulings arranged in chronological order. The book is divided into three volumes and five Chapters. Chapters 1 and 2 comprise of statutory provisions and rules on advance rulings, Chapter 3 covers topic-wise advance rulings. Chapter 4 covers appellate advance rulings and Chapter 5 covers judgments pronounced by High Courts relating to advance rulings. Key features India's first Digest on Advance Rulings (including Appellate Rulings) in GST Covers Advance Rulings, Appellate Advance Ruling and High Court cases reported from January 2020 - June 2020 Earlier rulings can be found in previous editions detailed on the inside front cover of this book List of rulings arranged: - alphabetically, - topic-wise, - authority/court-wise and - legislation/section-wise Search words index at the end of the book of the rulings digested by professionals

p="" This highly informative and carefully presented book focuses on the fields of ergonomics/human factors and discusses the future of the community vis-à-vis health problems, productivity, aging, etc. Ergonomic intercession must be seen in light of its effect on productivity because ergonomic solutions will improve productivity as the reduction of environmental stressors, awkward postures and efforts lead to a reduction in task execution time. The book provides promising evidence that the field of ergonomics continues to thrive and develop deeper insights into how work environments, products and systems can be developed to meet needs, demands and limitations of humans and how they can support productivity improvements. Some of the themes covered are anthropometry and workplace design, biomechanics and modelling in ergonomics, cognitive and environmental ergonomics, ergonomic intervention and productivity, ergonomics in transport, mining, agriculture and forestry, health systems, work physiology and sports ergonomics, etc. This book is beneficial to academicians, policymakers and the industry alike. ^

Serving as a guide establishing the current state of knowledge in various areas, ranging from Formal languages to Fluid Mechanics, with articles which provide relevant applications of well-known topics such as Computational Fluid Mechanics.
