Introduction to Logic. Basic Definitions. Logic is the study of the criteria used in evaluating inferences or arguments. An inference is a process of reasoning in which a new belief is formed on the basis of or in virtue of evidence or proof supposedly provided by other beliefs. An argument is a collection of statements or propositions, some of which are intended to provide support or evidence in favor of one of the others.

~~Introduction to Logic - UMass~~

Most people in the USA in an Introduction to Logic class will not have had any previous courses in philosophy. This is largely because in the public school systems in the USA, philosophy is not taught seriously.

~~1. Introduction | Introduction to Logic~~
