Managing your boss: Isn't that merely manipulation? Corporate cozying up? Not according to John Gabarro and John Kotter. In this handy guidebook, the authors contend that you manage your boss for a very good reason: to do your best on the job—and thereby benefit not only yourself but also your supervisor and your entire company. Your boss depends on you for cooperation, reliability, and honesty. And you depend on him or her for links to the rest of the organization, for setting priorities, and for obtaining critical resources. By managing your boss—clarifying your own and your supervisor's strengths, weaknesses, goals, work styles, and needs—you cultivate a relationship based on mutual respect and understanding. The result? A healthy, productive bond that enables you both to excel. Gabarro and Kotter provide valuable guidelines for building this essential relationship—including strategies for determining how your boss prefers to process information and make decisions, tips for communicating mutual expectations, and tactics for negotiating priorities. Thought provoking and practical, *Managing Your Boss* enables you to lay the groundwork for one of the most crucial working relationships you'll have in your career.

In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. The best of Peter F. Drucker's articles on management, all in one place. That "management" exists as a concept, a practice, and a profession is largely due to the thinking of Peter F. Drucker. For nearly half a century, he inspired and educated managers—and powerfully shaped the nature of business—with his iconic articles in Harvard Business Review. Through the lens of Drucker's broad vision, this volume presents an opportunity to trace the great shifts in organizations in the late twentieth and early twenty-first centuries—from manufacturing to knowledge work, from career-length employee tenures to short-term contract relationships, from command-and-control structures to flatter organizations that call for new leadership techniques. These articles also offer a firm and practical grasp of the role of the manager and the executive today—their responsibilities, their relationships, their decisions, and detailed processes that can make their work more effective. A celebrated thinker at his best, in this volume Drucker paints a clear and comprehensive picture of management thinking and practice—both as it is and as it will be. This collection of articles includes: "What Makes an Effective Executive," "The Theory of the Business," "Managing for Business Effectiveness," "The Effective Decision," "How to Make People Decisions," "They're Not Employees, They're People," "The New Productivity Challenge," "What Business Can Learn from Nonprofits," "The New Society of Organizations," and "Managing Oneself."
