To order call: 312-947-2053.

This book highlights current research and development in the area of sustainable built environments, currently one of the most important disciplines in civil engineering. It covers a range of topics, including sustainable construction and infrastructures, waste and wastewater management, enhanced sustainability, renewable and clean energy, sustainable materials and industrial ecology, building automation and virtual reality, and impact of climate change. As such it provides vital insights into responsible urbanization practices, and new tools and technologies in civil engineering that can mitigate the negative effects of the built environment.

It was supposed to be a lucrative job posing as a rich man's girlfriend, but that was before someone ended up dead. Now the police are leaning on call girl Diana Andrews and making her do their job for them. From Cape May to darkest Morris
